

## INSTALLATION INSTRUCTIONS

### Installing a Interlocking Carpet Tiles

LightLock and PlushLock tiles come in 2ft x 2ft tiles, and can be easily in packaged back into the shipping boxes and sent along to additional events.

Each tile has interlocking beveled edges on each side that easily link to one another. Begin by laying the first tile down in the corner of your exhibit space. Align the next tile directly next to the original tile and using your foot or hand lock the tiles into place. Continue this process until the surface is fully covered.

Once you have completed the assembly of your floor, set the edge pieces next to the flooring much like you did with the original tiles. Again, lock them into place by using your foot or hand.

### Disassembling the Interlocking Carpet Tiles

**Tip** In order to most effectively break down your LightLock and PlushLock floor, we suggest that you begin by removing any edging from the perimeter of your floor and store them together in a dedicated box.

To disconnect your floor gently lift each tile out of the locked position and remove one tile at a time.

### Storage and Maintenance

Floors can be cleaned using a vacuum cleaner or a wet rag. **Tip** It is advisable to clean your floor after each use so as to prevent a build up of dirt.

Tiles can be stored in original shipping boxes and reused time and time again.
